

Access Capital Partners hits first close on its European direct Infrastructure Fund

Access Capital Partners (“Access”) is pleased to announce the first closing of **ACIF Infrastructure**, securing institutional investors’ commitments of €126 million, halfway through its €250 million target.

ACIF Infrastructure focuses primarily on operational and cash yielding infrastructure assets in Europe. The Fund typically invests alongside established fund managers, institutional investors or corporates across a broad spectrum of opportunities including transportation, utilities, renewable energy and social infrastructure.

Four cash yielding investments have been warehoused: an operational windfarm, a platform investing in strategic electricity grids, a road concession and a meter asset provider company. They are being transferred to the Fund, allowing investors to benefit from the cash yield generated as soon as the first year of operation of the Fund.

Access’ Managing Partners, Agnès Nahum and Philippe Poggioli commented: “This first close represents a significant milestone in the development of Access’ infrastructure investment activity and we are encouraged by the level of support which validates our market positioning and acknowledges our strong potential investment pipeline for the Fund.”

Access Capital Partners invests in Infrastructure through a combination of direct and fund investments.
